Andrew F. Hayes. Introduction to mediation, moderation, and conditional process analysis: A

regression-based approach. 3rd ed. Methodology in the social sciences. Guilford Publications, 2022,

p. 732. ISBN: 9781462549030.

Abstract: Lauded for its easy-to-understand, conversational discussion of the fundamentals of me-

diation, moderation, and conditional process analysis, this book has been fully revised with 50%

new content, including sections on working with multicategorical antecedent variables, the use of

PROCESS version 3 for SPSS and SAS for model estimation, and annotated PROCESS v3 out-

puts. Using the principles of ordinary least squares regression, Andrew F. Hayes carefully explains

procedures for testing hypotheses about the conditions under and the mechanisms by which causal

effects operate, as well as the moderation of such mechanisms. Haves shows how to estimate and

interpret direct, indirect, and conditional effects; probe and visualize interactions; test questions

about moderated mediation; and report different types of analyses. Data for all the examples are

available on the companion website (www.afnayes.com) along with links to download PROCESS.

Library: HA31.3 .H39 2022.
